CURRENT FUNCTIONAL FOODS

Aims & Scope

Current Functional Foods aims to publish cutting-edge research in the field of foods and food ingredients with health benefits.

The journal focuses on functional foods with an emphasis on food chemistry, food technology, nutrition, and health. Reviews and research papers with an interdisciplinary approach are welcomed. The journal covers the fields of bioactive plants used for nutrition, dietary fiber, probiotics; functional lipids; bioactive peptides; vitamins, minerals and botanicals, and other dietary supplements. Experimental works dealing with food digestion, bioavailability of food bioactives and the mechanisms by which foods and their components are able to modulate physiological parameters connected with disease prevention of dysmetabolism will be considered for publication. The areas covered include new food bioactives, efficacy and toxicology of bioactive compounds, and other healthy food constituents. The use of genomic, chemical, and biochemical technologies for the study of such materials is included.
