Aims & Scope

Current Pharmacogenomics and Personalized Medicine (CPPM) is a transdisciplinary, peer-reviewed, biomedical journal that reports new findings and cutting-edge concepts in all areas of pharmacology. Special consideration is given to articles on pharmacogenomics and personalized medicine. CPPM is an accelerator for global personalized medicine and pharmacogenomics, as well as preclinical and clinical pharmacology. Importantly, the journal provides a multi-disciplinary, integrated platform from cell to society to address diagnostics and responsible pharmacogenomics applications in developing countries and the entire range of translational science from bench-to bedside in various therapeutic areas such as oncology, cardiovascular, neuropharmacology, endocrine diseases, amongst others.
