ISSN: 2405-5212 (Online)  
ISSN: 2405-5204 (Print)

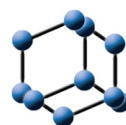

## Aims & Scope

Recent Innovations in Chemical Engineering publishes full-length/mini-reviews, research articles, and guest-edited thematic issues on recent innovations in chemical engineering.

Recent innovations may also include important recent patents, new technologies, methodologies, techniques, new materials, clean energy, energy storage, carbon neutrality, and applications related to chemical engineering. This field also covers resources that are involved in the operation and design of chemical plants and equipment for the conversion of raw materials into various end products.

The journal is essential reading for all researchers involved in chemical engineering science.
